Experiment 10: StyleHub – Online Fashion Shopping System

Aim:

To develop an online fashion shopping website using HTML, CSS, and JavaScript that allows users to browse clothing products, search and filter items, view product details, and manage their shopping cart.

Algorithm

1. Start and display fashion products.
2. Search and filter products by category.
3. View product details and select items.
4. Add, update, or remove items from the cart.
5. Calculate the total price and confirm the order.
6. Stop.

Code:

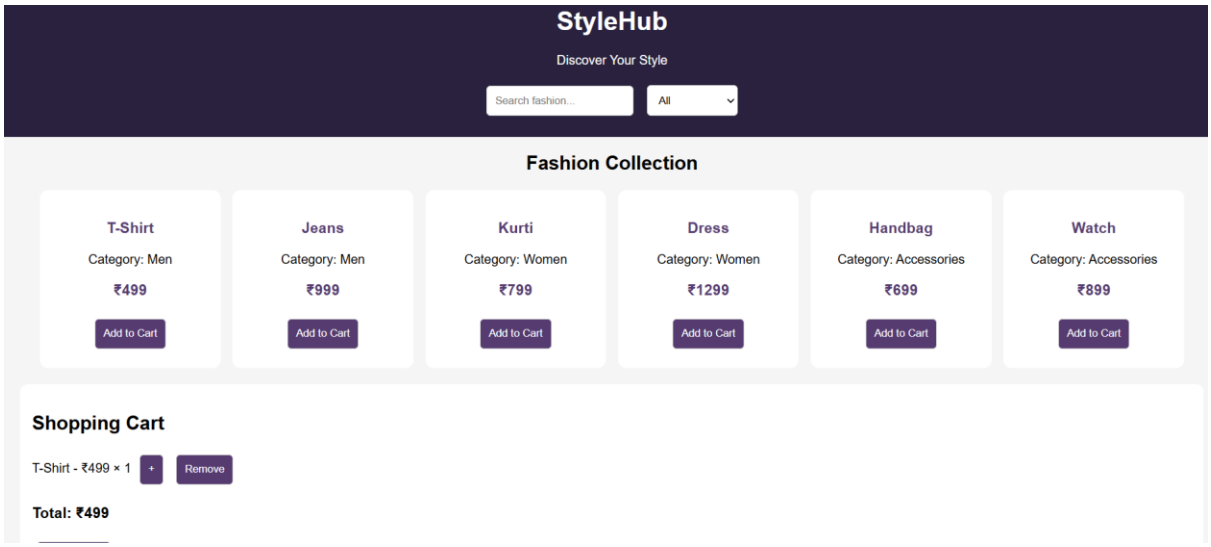

```
<!DOCTYPE html>
<html>
<head>
<title>StyleHub Fashion Store</title>
<style>
body{font-family:Arial;background:#f5f5f5;margin:0}
header{background:#29213d;color:white;padding:20px;text-align:center}
input,select,button{padding:10px;margin:6px;border:1px solid #ccc;border-radius:5px}
```

```
.products{display:flex;flex-wrap:wrap;justify-content:center;gap:15px}
.card{background:white;padding:18px;width:190px;border-radius:10px;text-align:center}
.card h3{color:#553b70}
button{background:#553b70;color:white;cursor:pointer}
#cart{background:white;margin:20px;padding:15px;border-radius:10px}
</style>
</head>
<body>
<header>
<h1>StyleHub</h1>
<p>Discover Your Style</p>
<input id="search" placeholder="Search fashion..." oninput="show()">
<select id="cat" onchange="show()">
<option>All</option><option>Men</option><option>Women</option>
<option>Accessories</option>
</select>
</header>
<h2 align="center">Fashion Collection</h2>
<div class="products" id="products"></div>
<div id="cart">
<h2>Shopping Cart</h2>
<div id="items">Your cart is empty</div>
<h3 id="total">Total: ₹0</h3>
<button onclick="buy()">Place Order</button>
<p id="msg"></p>
```

```
</div>
<script>
let data=[
{name:"T-Shirt",cat:"Men",price:499},
{name:"Jeans",cat:"Men",price:999},
{name:"Kurti",cat:"Women",price:799},
{name:"Dress",cat:"Women",price:1299},
{name:"Handbag",cat:"Accessories",price:699},
{name:"Watch",cat:"Accessories",price:899}
];
let cart={};
function show(){
let s=document.getElementById("search").value.toLowerCase();
let c=document.getElementById("cat").value;
products.innerHTML="";
data.filter(p=>p.name.toLowerCase().includes(s)&&(c=="All"||p.cat==c))
.forEach(p=>{
products.innerHTML+=`<div class="card"><h3>${p.name}</h3>
<p>Category: ${p.cat}</p><h3>₹${p.price}</h3>
<button onclick="add('${p.name}')">Add to Cart</button></div>`;
});
}
function add(n){cart[n]=(cart[n]||0)+1;update()}
function update(){
let t=0,html="";
for(let n in cart){
```

```
let p=data.find(x=>x.name==n),sub=p.price*cart[n];t+=sub;
html+=`${n} - ₹${p.price} × ${cart[n]}
<button onclick="add('${n}')">+</button>
<button onclick="removeItem('${n}')">Remove</button><br>`;
}
items.innerHTML=html||"Your cart is empty";
total.innerText="Total: ₹"+t;
}
function removeItem(n){delete cart[n];update()}
function buy(){
if(!Object.keys(cart).length){msg.innerText="Please add products first.";return}
msg.innerText="Order placed successfully! Order ID: SH"+Date.now().toString().slice(-6);
cart={};update();
}
show();
</script>
</body>
</html>
```

Output:

Result

Thus, the StyleHub online fashion shopping website was successfully developed with product searching, category filtering, cart management, price calculation, and order confirmation.
