Experiment 28: ArtistryHub – Artist Portfolio Website

Aim:

To design and develop an attractive, interactive portfolio website for showcasing an artist's biography, artwork gallery, achievements, publications, media, news, and contact information. The website will provide visitors with an engaging way to explore the artist's creative journey.

Algorithm:

1. Create a responsive homepage with a banner image, artist introduction, and navigation menu.
2. Design an About section containing the artist's biography, background, influences, and achievements.
3. Create an interactive portfolio gallery with artwork images and descriptions.
4. Display a list of creative works with titles and release or publication dates.
5. Add a media gallery for photographs, videos, and interviews.
6. Include news, upcoming events, and exhibition announcements.
7. Add interactive features such as artwork filters, a newsletter form, and contact messages.
8. Use CSS animations and responsive layouts to improve the website's appearance on different devices.

Code:

```
<!DOCTYPE html>

<html lang="en">

<head>

<meta charset="UTF-8">

Output

Result

Thus, the ArtistryHub Artist Portfolio Website was developed using HTML, CSS, and JavaScript. It demonstrates an artist biography, categorized artwork gallery, media section, creative works archive, event announcements, print shop, and contact form.
