Experiment 16: ComplainEase – Online Complaint Management System

Aim:

To develop a complaint management website where users can submit complaints, track their status, and provide feedback, while officers manage complaint resolution.

Algorithm

1. Display user registration and complaint submission forms.
2. Allow users to enter complaint category, description, and location.
3. Generate a complaint ID and display its status.
4. Allow officers to view complaints and update status and proof of work.
5. Provide an admin panel to manage accounts and officer access.

Program

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8">
<meta name="viewport" content="width=device-width, initial-scale=1.0">
<title>ComplainEase</title>
<style>
body{font-family:Arial;margin:0;background:#eef3f8;color:#26364a}
header{background:#123c69;color:white;text-align:center;padding:22px}
main{max-width:850px;margin:20px auto;padding:12px}
.card{background:white;padding:18px;margin:15px 0;border-radius:10px;box-shadow:0 3px 10px #ccd3dd}
input,select,textarea,button{padding:10px;margin:5px;border:1px solid #bbb;border-radius:5px}
textarea{width:90%;height:70px}
```

```
button{background:#1769aa;color:white;border:0;cursor:pointer}
.complaint{background:#edf5fc;padding:12px;margin:10px 0;border-radius:8px}
</style>
</head>
<body>
<header>
<h1>ComplainEase</h1>
<p>Register • Track • Resolve</p>
</header>

<main>

</script>
</body>
</html>
```

Output

Result:

The ComplainEase complaint management website was implemented using HTML, CSS, and JavaScript.
